Control range：

All lamps must be within the coverage of the remote control to ensure the reliability of the remote control. The remote control distance is stable and reliable within 20m, and there are no obstacles such as walls between the lamps;

Battery:

if the remote control is found dead, please replace the battery in time;

Using instruction：

The remote controller can be used normally only after it is paired with the lamp. Generally, the pairing is completed before leaving the factory;
