

Features

- Adopt integrated optical lens
- Great weather and UV resistance
- Support DMX512
- Can use external controller to achieve multiple color changes
- Single module can be cut, customization available

Application

• Applied for light box with depth 10-18cm, channel letters and signage lighting

Installation

• Fix by adhesive tape or screws

Optical & Electrical Parameters

Model No.	Light Color	CCT/Color Available (K/nm)	Beam Angle	Luminous Flux (lm/pcs)	Ra	Efficacy (lm/W)	Voltage (V DC)	Power (W/pcs)
	W	6500		17	80+	50		0.33
	R	620-630		3		10		0.33
PQ6	G	520-530	160°	11	/	30	12	0.33
	В	460-470		4		12		0.33
	RGBW	1		40		40		0.98

Other Parameters

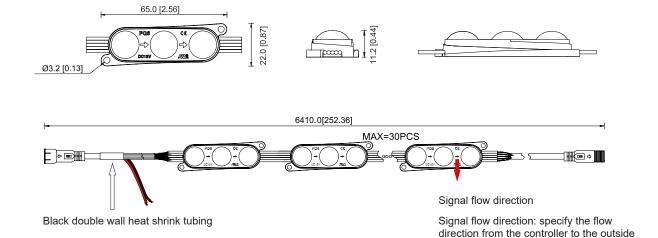

Model No.	LED Qty/pc	Product Size L*W*H(mm)	Standard Packing Quantity(pcs)	Max Run(pcs)	Working Temperature	Storage Temperature
PQ6	3	65*22*11.2	30	30	-20~+60°C	-20~+70°C

NOTE:

- 1. Testing temperature: 25±2°C
- 2. The above data are typical values. The actual data of each single product may differ from the typical values. The data is subject to change without notice.
- 3. Different color temperature will make luminous flux different.
- 4. The "Quantity" above means the LED quantity of single module.
- 5. Luminous flux & power tolerance within ±10%.
- 6. Max. cascading length is powered one end.

Profile Drawings

Unit:mm[inch]

Note:

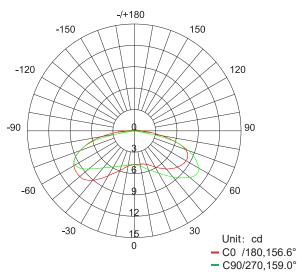

When in use, the controller must be connected to light up the product; if you need detailed dimensions, please contact sales Rep

Luminous Intensity Distribution Diagram

AVERAGE BEAM ANGLE(50%): 157.8°

Average Illumination

Note:The above two pictures are obtained when four colors of PQ6 are all bright. If you need data and parameters of other models, please contact the salesman Rep

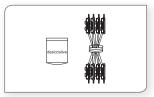

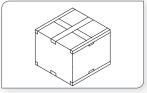

Reliability Test

Test Sort	Test item	Reference Standard	Test Condition	Test result	
waterproof test	IPXX	IEC60529	underwater depth: 1m/1h		
	PTC test		TH=-40~60°C, continuous cycle, every 2 hours per times (normal temperature for 15 min, temperature rise and fall for 45 min)		
	Thermal Shock Test	5	mal Shock Test TH=80°C/4h,TH=-40°C/4h, continuous lightened up		
Environmental test	High Temperature Resistance Test	Product	roduct TH=80°C, continuous lightened up arranty TH=60°C,UVB:280~315nm		
	Anti-UV Performance Test	Warranty			
	Indoor Aging Test	Policy	TH=25°C, continuous lightened up		
	Rain Test		Rain test 12h everyday, alternative on and off cycle every hour.		
Flame Retardant Performance Test	Flame Retardant Performance Test	UL 94	vertical burning test		

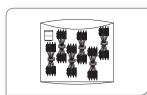

packing

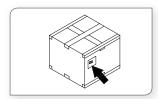

Prepare the desiccant and bind the product.

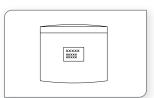

Seal the box.

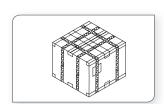

Put the product and desiccant into static shielding bag.

Label the box;

Seal and label the static shielding bag.

Use packing belt to pack after adding the edge protectors.

Put the static shielding bag side by side into carton box.

Packaging information

Model No.	Product Size L*W*H(mm)	Carton Size(mm)	pcs/bag	bag/Carton	Net Weight(kg)	Gross Weight(kg)
PQ6	65*22*11.2	390*390*325	2	16	14.85(1±10%)	16.25(1±10%)

Note:

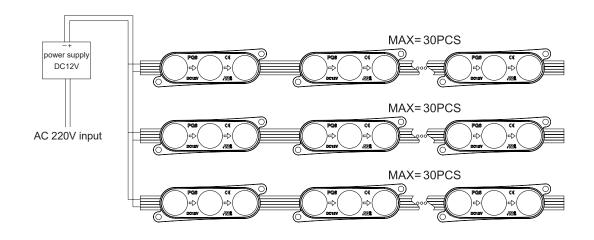

- This product use customized inner card, bag, inner box and carton.
- · Above-mentioned quantity and weight are only based on above packing method

Add:No.1000,Section 2,2nd Konggang Road, Southwest

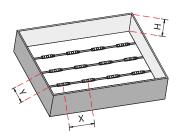

Installation

Connection Diagram

Installation Reference

Model No.	Surface Material	Depth(H)cm	Illumination(lux)	Evenness	Density (pcs/m²)	Spacing (X*Y)cm	Watt Density (W/m)	Visual Effects
	PQ6 White Soft Film	10	1287-1538	0.84	10*10	10*10	100	- OK
PQ6		12	712-838	0.85	7*8	14*12	56	
		15	578-672	0.86	6*6	16*16	36	
		18	443-502	0.88	5*5	20*18	25	

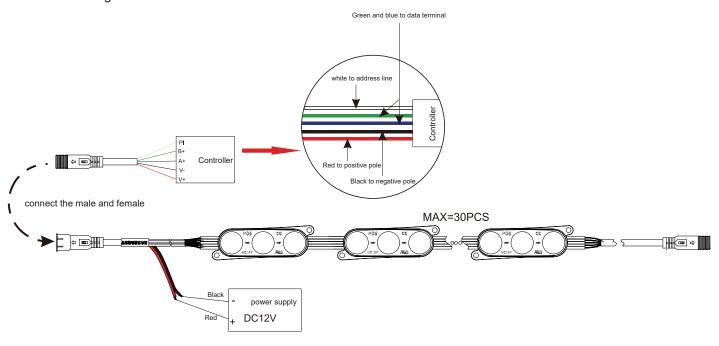

Note:

- 1. X indicates the horizontal center spacing between modules;
- 2. Y indicates the longitudinal center spacing between modules;
- 3. Single LED modules are arranged in a square, X=Y.
- 4. When the depth of light box H>18cm, use more products to satisfy Illumination demand
- 5. Please contact the sales for other data.
- 6. Customized wire length available.
- 7. The above data is for common demand , you can increase the density for actual demand.
- 8. The above data are obtained when four color of PQ6 are all bright

Connection Diagram of Controller

Accessories & Tools

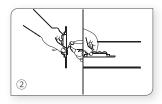

Diagonal Pliers

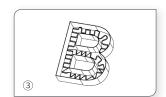

LED power supply

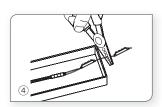

Connection Terminals

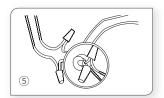

Installation steps

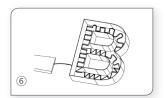

- 1.Clean the mounting surface.
- 2.Peel away the release paper on the back of led modules and stick them onto mounting surface.
- 3. Evenly arrange the led modules with appropriate space.
- 4.Cut the modules according to the requirements and treat the cut place with insulation and waterproof arrangement.

 Note: Cut in the middle of the wire.
- 5. If the product needs to be connected, it is better to fix with connection ends.
 - Note: Treat the thread with insulation, waterproof, and anti-corrosion arrangement as it cannot pull out by hands.
- 6.Make sure the correct connection of positive and negative poles between led module and power supply.
- Note: Treat the thread with insulation,waterproof, and anti-corrosion arrangement as it cannot pull out by hands.

Attentions before installation

Before installation, check that the product parameters are consistent with the requirements (Seeing product specifications or product labels) Load voltage, current, power and power supply should be matched with the product.

Follow the instructions of wiring diagram (first connect the load and then the power supply) to avoid short circuit.

Make sure the correct connection of positive and negative poles between products and power supply. Otherwise, the light will not be on.

Make sure the power cord firmly screwed into the terminal and it should not be pulled out by hands.

The terminal should have insulation, waterproof and anti-corrosive treatment.

If the working length exceeded the max run length, make sure to have extra power supply.

If it needs higher current of a LED, make sure having extra cooling.

Common Faults and Troubleshoot

Quick Guide							
Problems	Reasons	Solutions					
All LEDs can not light on.	No electric supply.	Power on					
	Automatic power protection from the open or short circuit in output of the power supply.	Fix the short circuit problem.					
	Wrong connection of power supply.						
	Some switching mode power supplies are not powered.	Check the power supply					
LEDs can not light on partly.	Power supply line error.	system to fix it.					
	Mistaken wire connection of some of products	Correctly connection					
	Power overloaded.	Replace with more powerful power					
Brightness of LED is inconsistent tor insufficient.	Power supply circuit excessive consumption.	Make sure the working voltage of the product within ±5% of standard voltage, or keep balance by circuit power consumption.					
	Excessive quantities in series connection of the product	Reduce the quantities of the product i series connection to meet requiremen					
	Connection point fault.	Remove bad connection point.					
LED flicker.	Switching power supply failure.	Replace a new power supply.					
	Wrong Installation or use of products	Please follow the instructions					

A Warning

- Do not disassemble or retrofit the light. Do not touch the surface of the light with a sharp object.
- Do not do live-line working during installation, especially for high voltage product.
- Do not use any organic chemical solvents.
- Use neutral glass adhesive to fix this product and it needs to be dried 4 hours in the open environment after operation.
- Treat the ends and the circuit connection points that are not connected to the main line with insulation, waterproof, and anti-corrosion in the installation.
- Use 18AWG (0.75mm² cross-sectional area) or thicker core wire to avoid adverse consequences caused by overheating, if the power cable need to lengthen.
- Make sure the input voltage meets the requirements and lines are connected correctly before lighting on.
- This product is for signage, and do not use as general lighting.
- Series connection within the max run.
- The length of the power cable between the power supply and the led strip should not exceed 2 meters. Otherwise, large circuit loss will lead to inconsistent brightness.
- Installation, maintenance and repair should be operated by a qualified technician.

Statements and Recycling

Statements:

Repair should be operated by a qualified technician, if the external circuit or main line of this product is damaged.

The parameters given in this manual are typical values and for reference only.

All illustrations and drawings in this manual are for reference.

This product is subject to change without notice.

Recycling:

LED lighting products belongs to electronic products, please do recycling treatment according to the relevant WEEE directives.
