INTRODUCE

ABOUT US

BVInspiration is a brand extension of Blueview established in 2016 which specializes in commercial architectural luminaires. We deliver high-performance LED luminaires for offices, commercial, educational institution, recreational and hospitality spaces. We provide a range of innovative solutions to satisfy most of our client's ever-changing requirement of today's project including design and build-to-order custom lighting solutions. BVInspiration is the best in class for our forward-thinking capabilities and innovativeness. We work closely with our clients and stakeholders to develop products that are in trend to deliver functional and aesthetical advantages. All of our products are designed and engineered with the principles of captivating, ease of installation, usage and maintenance.

WHY BVINSPIRATION

Our product's engineering design was covered every link from material, production feasibility,transportation, inventory, to in field installation. We are in close contact with designers,suppliers, and assembly workers to build products that are realistic, superior in design, functionality, and flexible luminaire systems.

We provide more optical options with Direct lighting, Direct & Indirect Lighting, Asymmetric, Double Asymmetric lighting with PC / PMMA lens, TIR, Reflector, Louver. Beam angle from 15° to 110°. More LED options in CRI95+, 90+ in around 10 CCT options from 1800K to 6500K, Tunable white, Dim to Warm. More dimming methods 0-10V, DALI, DMX, Triac forward/Reverse Phase.

Innovating Sound Solutions

Our Acoustical Laboratories

BVI's Acoustical Laboratories
where innovation meets acoustics.

As pioneers in the field, we take pride in being the first lighting manufacturer to house an in-house acoustical laboratory. Our commitment to sound excellence has earned us global recognition as a trusted source of valid acoustical data. Partnering with prestigious universities, our laboratory plays a pivotal role in advancing noise abatement solutions.

Professional Acoustic Lighting Manufacturer
Transforming Sound into Illumination

BVI is not just lighting experts; we are pioneers in the fusion of light and sound.
As a professional acoustic lighting manufacturer, we have redefined the way you experience both.
Our commitment to excellence shines through in every product we create, blending aesthetics with acoustics to create innovative lighting solutions that elevate your space.

Why Choose BVI?
The Preferred Choice for Acoustical Solutions.
Unmatched expertise in acoustical testing.
Cutting-edge facilities equipped with the latest technology.
Globally recognized and accredited.
A commitment to advancing noise abatement solutions.

Producing the parts, Testing Sound, Creating Silence

Our state-of-the-art laboratory specializes in sound transmission, absorption, and intensity analysis.
It serves as the cornerstone of our research and development efforts to combat noise pollution.
A central control room continuously monitors various acoustical tests.

Key Tests Conducted

Pushing Boundaries in Acoustical Testing

Reverberation chambers are the heart of our laboratory, enabling tests such as sound absorption, transmission loss, impact sound transmission, sound power, sound pressure, and dB(A) measurements.
This 200 cubic meters (over 7,000 cubic foot) chamber designed to reflect sound and used for material and buck testing. The hard, non-porous walls with stationary and rotating sound wave diffusers allow our team of experts to evaluate different acoustic treatments by testing for Sound Transmission Loss (STL), sound absorption, and sound power.

We provide a wide range of tests, including NRC tests, E90 testing , and more.
Our commitment to transparency means that we furnish our partners with detailed data and graphical presentations immediately after each test.

Product Testing Capabilities:

Sound Quality
Our in-house Acoustics Lab is the only lab specifically designed for testing Acoustic Lighting and architecture products.

Sound Transmission Loss
We accurately measure the sound energy from the source and determine whether it meets noise and sound quality goals.

Material Testing capabilities:

Noise Control Optimization
Our team uses the latest technology to determine your product's base-line sound levels and will then map all sound sources and paths.

Sound Absorption
Using our in-house, echo-free Hemi-Anechoic Chamber, we can isolate and analyze the acoustical composition and impact of noise structures.

Accreditation & Standards

Setting the Standard for Acoustical Excellence

Our Acoustic Testing Facility is designed to comply with ISO 354 standards.
Our laboratory proudly carries accreditation from the China Inspection Body and Laboratory Mandatory Approval (CMA).
Our adherence to established standards ensures the accuracy and reliability of our testing services.

Join Us in the Pursuit of Silence

- Partner with BVI for innovative acoustical solutions.
- Explore groundbreaking approaches to noise reduction.
- Together, let's create a quieter, more comfortable world.

INTEGRATED SOLUTION —— FOR LIGHT & SOUND

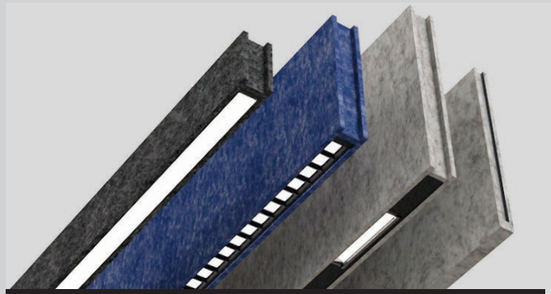

Our goal is offering the integrated solution for light & Sound, which will create a comfort lighting enviroment, and also clear out the background noise, and deliver better acoustics to your room.

Determine the ideal reverberation time (RT60) using global building standards such as ANSI, WELL Building Standard™ (WELL) and the Leadership in Energy and Environmental Design™ (LEED®) and required light using the IESNA.

These standards are driving change to balance health and wellness in commercial building design by providing recommendations for reducing noise in various environments.

Ssh! Ceiling and Luminaires system is ideal for open, multi-use or any interior spaces. It's a flexible system enable the optimization of sound and light.

DESIGN REFERENCE

Ssh! Slim Lighting + Box Mini

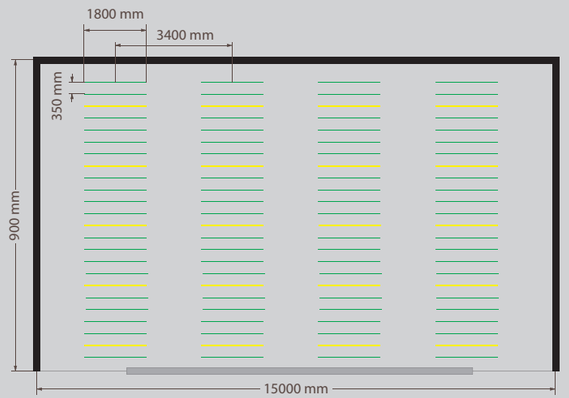

Ssh-Slim a marvel of engineering design with a slender 35mm width (53mm total). This luminaire offering unmatched flexibility.
Choose from 9 options, asymmetric, PC lens, TIR, reflector, and louver, with beam angles from 15° to 110°.
Enjoy a wide range of LED options with CRI values of 95+ and 90+ across 10 CCT options (1800K to 6500K), including tunable white. Multi-ple dimming methods (0-10V, DALI, DMX, Triac forward/reverse phase) are available.

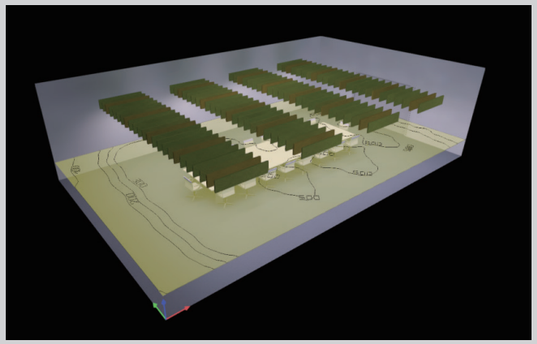

CALCULATION INFO

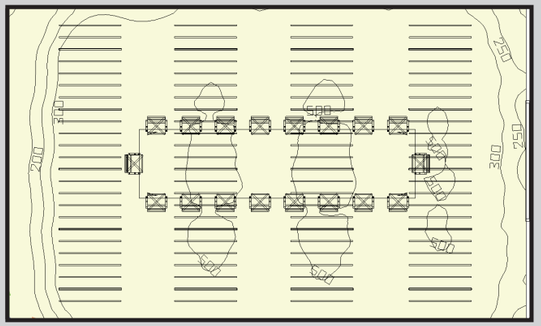

Ceiling Height:	4m
Space Dimenssions:	L15m x W9m
Box Mini Size:	W33 × L1800 x H381mm
Lighting Size:	W53 × L1800 x H381mm
Sabins/ft² based on:	1000Hz

SPACE SURFACE INFO

Floor:	Carpet, heavy on concrete
Ceiling:	Gypsum board, 5/8 in think, 1layer
Wall:	Concrete block, painted Concrete, rough
Window:	Glass, heavy, large panes, sealed

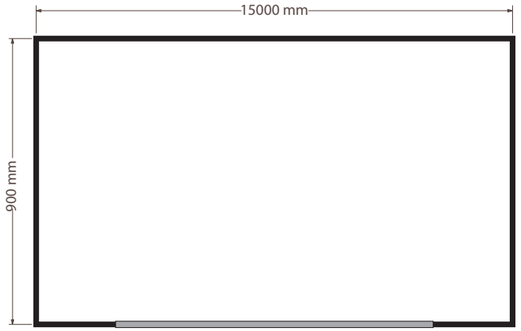

INSTALLATION

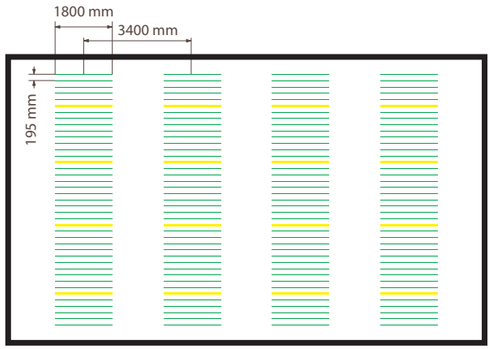

On-center (OC) spacing: 350mm x 3400mm
Sabins / ft²: 0.8
Ssh-Mini Box-T33mm QTY: 76pcs
Ssh-Slim Luminaire-T53mm QTY: 20pcs

INTEGRATED SOLUTION —— FOR LIGHT & SOUND

ACOUSTIC LIGHTING

People believe that lighting and acoustics are the most important factors affecting their health in the workplace. Studies have shown that the acoustics of a room can affect productivity, the overall quality of human-computer interaction, and personal health. We are developing a product portfolio in which lighting and acoustics can work harmoniously.

Acoustic lighting can create the best lighting conditions and maintain the indoor acoustic balance, thereby enhancing human health. It is not only to create a well functioning working environment, but also involves the overall concept, in which the room has sustainable value.

As an acoustic solution, sound-absorbing luminaires provide the best solution to the common high noise levels and reverberation problems in open multi-functional spaces. The integrated system simplifies specification, procurement and installation, and obtains a unified appearance, thereby enhancing the architecture of each interior space. Not only can the sound level be controlled, but the optimal illumination can also be achieved, thereby increasing the comfort and happiness of people living in the space. Consistent with our commitment to excellence in engineering and workmanship, every acoustic product and acoustic panel companion is designed with lamps as a platform.

This "lamp first" approach ensures that technology and lighting quality are not sacrificed. Instead, it optimizes the aesthetics and comfort of each space through beautiful, coordinated lighting and acoustic solutions.

Combining standard-compliant LED workplace lamps with flexible sound insulation panels can best illuminate one or two workplaces while minimizing reverberation and achieving an ideal balance between sound absorption and sound insulation. An optional desk screen separates spaces that require extra privacy. The simple lamp design uses discreet colors to ensure visual tranquility.

Better Lighting Less Disractions. Greater Productivity.

Lighting and acoustics are the basic factors of space planning. The planned complete solution combines the required performance into one system. According to space requirements, all lamps and acoustic components can be flexibly placed and expanded. The existing lighting system of our company can also be supplemented by the corresponding series of acoustic components. At the same time, the system solution allows the light body and the sound body to be assembled separately, so that at the end of the construction phase and in the already arranged room, the dust-sensitive acoustic components can be optimally arranged. To create the best lighting conditions and a pleasant working atmosphere, space acoustics should be considered in the early stages of the planning process, because the product and its location in the room are of utmost importance.

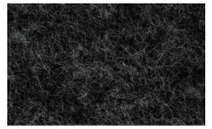

Applications

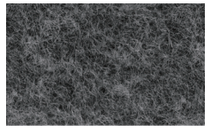

Open Office Spaces
Conference Rooms
Hospitality & Healthcare
Educational Institutions
Retail Stores
Entertainment Spaces
Commercial Spaces
Restaurants and Cafes
Gymnasium
Government buildings
Theater and museums
Audio visual

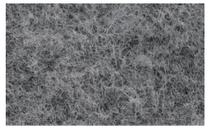

Ssh!

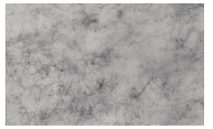

Acoustic lighting's panel are made from 100% poly-ethylene terephthalate(PET), with 50% post-consumer recycled material. It's manufactured using a thermoformed tech resulting a light weight, high density compressed polyester acoustic panel or title designed to control unwanted noise as well as provide a decorative function.
PET is a green product manufactured free of added chemicals, binders, adhesives and dyes. The products is very adaptable, it can be cut, notched or timed for installation purpose.
Nearly every environment interacts with sound, PET can achieve a triple purpose-functionally acoustic in nature, enhanced design of any space and environmental consciousness.

ACOUSTIC SEAMLESS LUMINAIRE & CEILING SYSTEM

Ssh! Acoustic Seamless Luminaire & Ceiling System delivers high performance noise reduction and sleek integrated illumination in a single cost-effective, versatile product. Choose from an assortment of lengths, widths, and depths, in various beam-angled linear luminaire configurations, with power integrated into its suspension cable, simplifying installation, and removing the unsightly clutter of cords.

Units are available in a wide range of colors, it can be easily mixed and arranged as desired to achieve an endless array of dynamic layouts.

The Seamless joiner system also brings an impactful combination of style & function to your next project.

Integrated Luminaire's Options

Ssh! Acoustic Seamless offers various luminaire solutions which is satisfying for most of Office, Hospitality & Healthcare, Schools, Gymnasium, Government buildings etc.

Versatile Endcaps & Universal Seamless Joiner

Choose end caps that blend with your color choice or choose a color scheme that works with the branding of the space. Combine Acoustic Box and Luminaires with joiner brackets, resulting in a seamless acoustic beam.
